ENVIROSET 4110

TECHNICAL DATA SHEET Two Pack Pigmented Solvent Free Epoxy Coating

A & I Coatings ENVIROSET 4110 is a two pack pigmented, solvent free, 100% solids epoxy with excellent surface hardness and adhesion. It exhibits high water resistance, chemical and oil resistance with the ability to build virtually unlimited film thickness.

	Uses • Concrete protection • Floor Coatings • Repaints/ maintenance • Wear resistant coating • Warehouses • Workshops • Carparks • Manufacturing Facilities • Amenities						
USES & BENEFITS	 Benefits 1. Can be used as an intermediate coat and also for a subsequent topcoat for A & I Coatings high performance coating system. 2. Exceptionally hard wearing 3. Easy Mix ratio 4. Excellent flow properties. 5. Light reflective 6. Easy to clean 		 Limitations 1. Amine bloom may occur if humidity is above 80%. 2. Minimum surface temperature should be at least 3 ° C above dew point at time of application and initial cure. 3. This product will chalk when continuously exposed to sunlight. 				
PHYSICAL PROPERTIES	Vehicle Type	Ероху					
	Hardener	Amine					
	Mixing Ratio	3:1(Part A : Part B) by Volume					
	Pot Life	Approx. 25 minutes @25°C using standard hardener.					
	Finish	Gloss					
	Theoretical Coverage	4-6m ² per litre @160-250µmDFT (160-250µmWFT)					
	Volume Solids	100%					
	Recommended DFT	160-250µm/coat. Dependent on application					
	Usual No. of Coats	2-3 (dependent on substrate)					
	Primer Required	Not for concrete. For other substrates, Contact A&I Coatings.					
	Colour	8 standard colours or any RAL or AS 2700S colours.					
	Pigmentation	Titanium dioxide and other pigments					
	Product Weight	1.34Kg/Litre					
	Abrasion Resistance	Very good					
ENGINEERING DATA		Enviroset 4110 dis situations at ambie Consult A&I for spe · Hydrochloric Acid · Nitric Acid (10%) · Sulfuric acid (40%	(10%)	ance to many comm tures. The following o ations. · Kerosene · Turpentine · Skydrol	on chemicals in spill or splash chemicals are an example only. · Toluene · Organic Food Matter · Grease		
	Chemical Resistance	 Uric acid (concent Sodium hydroxide Hydrogen peroxid 	rated) (10%) e (3%)	 Hydraulic Fluid Brake Fluid Motor Oil 	 Wine Diesel Hydrocarbon solvents prolonged exposure without n request. Exposure based on 		
	Dry Heat Resistance	Up to 120°C					
	Hot Water Resistance	Up to 70°C					
	Solvent Resistance	Excellent for many solvents					
	Durability	Excellent, but will chalk under UV exposure without damage to the integrity of the coating.					

ENVIROSET 4110

TECHNICAL DATA SHEET

Two Pack Pigmented Solvent Free Epoxy Coating

CURING DATA	Substrate Temp.(^o C)	Foot Traffic	Vehicular Traffic	Full Cure	Recoat Time min				
	25 °C	24 Hrs	72 Hrs	7 Days	12 Hrs				
	Note: When overcoating with an epoxy based topcoat, this should occur within 36hrs at 25°C. No water or condensation should contact the coating for 5 days from installation.								
SURFACE PREPARATION	Concrete	Allow new concrete to cure for minimum 28 days prior to coating. Surface must be sound, dry, free from all loose material, laitance, old coatings, dust and surface contaminants (e.g. oil, grease, chemicals, release/curing agents etc). Substrates must be mechanically treated by abrasive blasting or grinding to achieve a clean anchor pattern for best adhesion. Oily surfaces must be detergent cleaned and water blasted. Please note that moisture content in the concrete must be no greater than 4% pbw prior to application of the E4110. Ensure no rising moisture will occur in concrete by means of an effective subgrade damp proof membrane. Concrete to be min 25Mpa compressive strength and 1.5Mpa pull off strength.							
APPLICATION DATA	Mixing	Power stir Pack A, then blend with Pack B to correct ratio. Power stir thoroughly for two minutes prior to use. Only mix required amount and use within the stated pot life. If using unpigmented Pack A, add the 1kg Colour pot to Pack A and mix for 1 minute before adding Pack B and mixing again for 2 minutes.							
	Application	10-13mm Nap Roller.							
	Ambient Temparature	Apply between 8	between 8-35 °C						
	Thinning	If required, use Methylated Spirits or V122 Epoxy Thinners. Maximum thinner addition is 10% of mixed quantity and only added after Pack A and B has been mixed. After Thinners added, a further 45 seconds mixing is required.							
	Cleaning	Use Xylene or A	cetone for clean-up.						
PACKING & STORAGE	Packing	Available in 10L	L packs. For other sizes, contact A & I Coatings.						
	Storage		12 months if stored in sealed containers away from heat and moisture. Subject to re-inspection thereafter.						

All applicable statutory regulations must be observed in the application of this product. Users must first read the Safety Data Sheet for ENVIROSET 4110. Users should familiarize themselves with all the safety aspects of the product prior to use.

Please ensure the current Technical Data Sheet is consulted prior to specification or application of A & I Coatings products. A & I Coatings will in many instances provide Area Specific Instruction Sheets which contain detailed instructions on how to achieve desired results for specific areas. If the surface intended to be painted differs from the specification, please consult the A & I Coatings Technical team on 1800 819 585.

All surplus materials and empty containers should be disposed of in accordance with appropriate regional regulations/legislation. Note: The figures quoted for pot life and drying/curing times are not definitive. They are dependent on onsite conditions, such as volume of material mixed, ambient and substrate temperatures, weather and ventilation. DISCLAIMER Since the use and application of this product is beyond our control, we cannot be held responsible for product field performance. The information presented above is the result of our considerable experience with this product but is not to be construed as a performance warranty.
